# EMERGENCY SANCTUARIES & SHELTERS

CoverSix is a leading provider of modular emergency sanctuaries for use in conflict zones, hazardous environments, and remote locations. Our sanctuaries can be integrated as part of a permanent solution, or temporarily deployed to protect life against many types of attacks. Trusted by the U.S Department of State, Diplomatic Security, and Overseas Building Operations, CoverSix Emergency Sanctuaries are designed and built to meet the most rigorous of challenges.

## BLAST & BALLISTIC PROTECTION

Our sanctuaries incorporate a successfully tested ballistic-resistant and blast-resistant design. These buildings have been tested to exceed design criteria for high-explosive charges. With top tier quality and safety, they provide peace of mind that is otherwise unavailable in conflict zones, hazardous areas and remote locations.

## FORCED ENTRY PROTECTION

"Where there's a will, there's a way." We know there are some enemy threats that will look for any weakness in a design and use a variety of tools to attempt entry from all angles. From this perspective, our designs are tested to withstand up to 60-minutes of forced entry attempts with a variety of tools.

## CBRN PROTECTION

As protection from Chemical, Biological, Radiological, and Nuclear (CBRN) threats, shelters can come with fresh air systems to remove at least 99.999% of any airborne particles with a size of 120 nanometers (0.12 micron) or larger. This would include nuclear fallout dust particles, infection and contamination. A secondary activated charcoal filter is designed to protect against chemical weapons and other homeland threats.

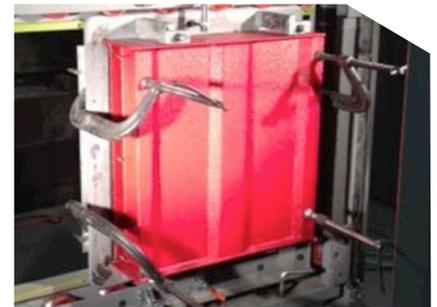

## SUSTAINMENT

CoverSix's Emergency Sanctuaries are designed to protect personnel until help arrives. With battery back-up, 100% HVAC redundancy, and water and food storage, our sanctuaries can provide shelter in the event of an attack for up 96-hours.

## SIZE AND OCCUPANCY

Single and multi-section designs based on the ISO footprint allow shelters to be sized up or down to meet specific customer requirements. CoverSix emergency sanctuaries can accommodate up to 60 people in single units and can be sized to provide space for other amenities such as kitchens, bedrooms, washrooms, or an infirmary.

## TESTING, CERTIFICATION AND COMPLIANCE

CoverSix Emergency Sanctuaries are engineered to meet exacting customer requirements. We can provide sanctuaries which meet or exceed numerous global standards and specifications, including FEMA 453, DoD UFC 4-010-01 High, EN 1063 BR6, NIJ 0108.01 Level IV, UL752 Level 10, STANAG, ABS, BV, DNV GL, and IBC 2015.
